

THE CLIENT PERSPECTIVE: CDBG-DR Leaders Jane Brogan and Emily Thompson

Our approach is based on the specific experience of our practice leaders, Vice Presidents Jane Brogan and Emily Thompson, who have helped design, manage, and execute some of the most complex and high-profile CDBG-DR programs in the U.S. Highlights of our team's experience include executive level leadership and oversight of such programs as:

- New York Governor's Office of Storm Recovery (GOSR)
- New York City's Hurricane Sandy Recovery portfolio, including the Build it Back (BIB) Program
- Lower Manhattan Development Corporation's World Trade Center Site Reconstruction and Lower Manhattan Revitalization

JANE BROGAN

Jane developed her approach based on lessons learned and best practices garnered from 15 years as a CDBG-DR grantee managing over \$10 billion. Jane's practical understanding from designing and implementing programs

as a grantee will help Hill's clients navigate the complex regulations and requirements of the CDBG-DR program. Through her work leading policy and programs for the long-term recovery after Superstorm Sandy, she worked with impacted residents as well as stakeholders at the federal, state, and local levels to build impactful and compliant programs that addressed needs from housing and economic revitalization to infrastructure and resiliency.

Jane Brogan

Vice President of Long Term Recovery/HUD
JaneBrogan@hillintl.com

"I know first-hand the pressures faced when trying to rebuild but there is also the opportunity to design the recovery to meet the needs of those impacted, prepare for future risk, and support vulnerable populations. I am committed to helping communities achieve those goals using lessons learned, tested solutions, and compliance."

EMILY THOMPSON

Emily brings nearly a decade of long-term disaster recovery expertise combined with more than 20 years of total experience in the legal field. Through her work as legal counsel to New York State's \$4.5 billion Federal allocation

following Superstorm Sandy, Emily knows first-hand that verifying compliance with recovery and resiliency regulations can be a difficult but necessary part of the recovery process. Emily helped to develop and implement compliant housing recovery, property buyout and acquisition, resiliency, and community planning programs and is eager to leverage this experience for the benefit of Hill's clients.

Emily Thompson

Vice President of Long Term Recovery/HUD
EmilyThompson@hillintl.com
646-260-5285

"Standing up a recovery office in the aftermath of a disaster is a challenging but exciting time. Communities struck by disasters need all the support they can get to design programs that will benefit residents, businesses, and everyone impacted as quickly as possible—and to do so with compassion and consideration."

PARTNERS IN LONG-TERM RECOVERY

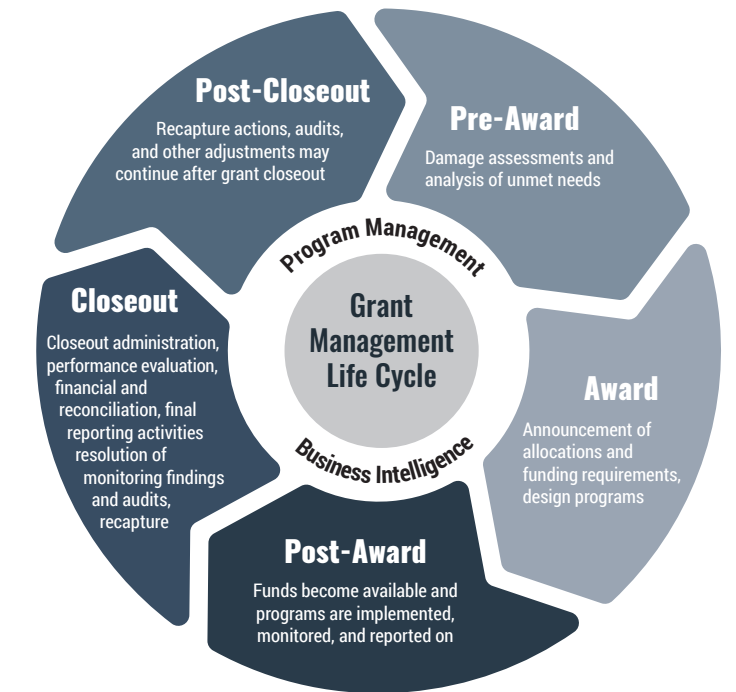

HILL INTERNATIONAL'S HUD CDBG-DR SUPPORT SERVICES

HILL INTERNATIONAL: DELIVERING THE INFRASTRUCTURE OF RECOVERY

Hill International, Inc. provides the full suite of CDBG-DR administration and management services to our recovery clients, offering a truly “one stop shop” with a single point of contact. Our experts are available to help you realize a holistic, cohesive program to help your community. We do this through:

- Being a strategic advisor and partner for overall grant administration.
- Using data and needs assessments to inform best programs for your needs.
- Supporting your success from pre-award through closeout, including assistance with:
 - Recovery program planning and design
 - Establishing a Program Management Office (PMO)
 - Executing the program as planned
 - Program monitoring, reporting, and compliance

To provide these services, Hill will call on our more than 3,200 employees, located in offices across the U.S. and around the world. Our grant and program management professionals bring the latest skills, tools, and technologies in:

- Program, Project, and Construction Management
- Grant Writing and Management
- Data Management/PMIS Design and Implementation
- Estimating and Scheduling
- Program Controls
- Procurement
- Contracting
- Engineering
- Technical Advisory/Claims Avoidance
- Data analysis

OUR INDEPENDENCE, YOUR ADVANTAGE

Our grant management services are enhanced by Hill’s unique role as an exclusive program, project, and construction manager. As Hill does not hold design or construction contracts, we are free of any conflicts of interest, whether real or perceived.

In addition, Hill International is first and foremost an AEC partner for your community. Our nearly five decades of construction management experience offers the added advantage to grantees as our field personnel know first-hand how to verify reconstruction efforts, whether for housing or other critical community infrastructure, is delivered as planned, as required, and on budget and within schedule.

This combination offers our clients added confidence in our recommendations and strategies, knowing that our experts will always act in the best interests of your program and your community.

The Department of Housing and Urban Development (HUD) provides eligible communities impacted by disasters with flexible Community Development Block Grant-Disaster Recovery (CDBG-DR) grants to help facilitate resilient recoveries. CDBG-DR grants may be allocated to help cities, counties, and entire states recover from Presidentially declared disasters.

These flexible funds focus on long-term recovery and resiliency efforts through:

- Long-term Recovery
- Housing
- Economic Revitalization
- Infrastructure
- Mitigation

Within each of these components, communities have the opportunity to leverage CDBG-DR support to meet the specific goals of their recovery—all within HUD’s requirements.

HELPING COMMUNITIES

Hill helps communities design and implement long-term recovery programs that meet the unique needs of their specific disaster and their residents.

We do this by leveraging expertise in a wide variety of programs, including:

- Single-family housing rehabilitation.
- Affordable housing new construction.
- Buyouts.
- Small and large infrastructure; restoration.
- Water and wastewater facilities.
- Economic development.
- Workforce development.
- Coastal resiliency.
